

Soft-Touch/ABS

Soft-Touch/ABS combines the strength and durability of ABS with a smooth, rubber and leather-like surface that delivers a premium tactile experience.

Engineered with a coextruded ASA/TPE cap layer, it offers a low-gloss finish with excellent weatherability, UV stability, and chemical resistance while maintaining the high-impact performance and thermoformability of ABS. The result is a durable, 100% recyclable material with a luxurious feel that's comfortable to touch and built to last.

Applications:

- ✔ Van interior
- ✔ Automotive interior
- ✔ ATV components
- ✔ Marine dashboards
- ✔ Conversion van interior
